Why Were The Items Distributed Here? What Are The Greatest Needs In This Community?

One of the most populated districts in South Lima is Villa El Salvador, with over 420,000 inhabitants. We chose to distribute Mannapack rice in Villa El Salvador because it is a district where there are sectors of the population facing situations of poverty and vulnerability, especially in areas such as food and housing. The presence of many communal kitchens and social programs aimed at vulnerable families shows that there are still needs that require attention. Therefore, as a Church, we decided to deliver donations, in a targeted manner, to help improve the living conditions of the beneficiary families. This is how we met Lucia Obregon.

Name

Lucia Clemencia Obregon Gutierrez

Age

Gender

female

Occupation

doesn't work

Family Size

two people (his brother Marcelino, 65 years old, and Lucia, 70 years old)

What Are Their Living Conditions?

Lucía was diagnosed with a severe disability associated with spastic hemiplegia, a neurological condition that affects the mobility of one side of her body. Currently, she has difficulty stretching her legs and requires support to move around, as she cannot do so independently and faces challenges using public transportation, due to the limitation in the movement of her leg making it difficult for her to get into vehicles, and on some occasions, taxi services cannot transport her.

Lucía lives with her brother Marcelino, who is her main support in mobility activities and daily care. According to Marcelino, Lucía's disability situation originated from an accident that occurred several years ago when he intervened to help his son, who had been a victim of a hit-and-run.

Lucía currently has schizophrenia and dissociative amnesia, conditions that can cause episodes in

which she experiences difficulties maintaining an adequate connection with reality and remembering certain events.

For his part, Marcelino works occasionally as a cook, making this his main source of income. Lucia receives financial support from the Peruvian government through the Pensión 65 program, a resource that helps cover her basic needs.

Describe The Types Of Needs This Individual Has.

The household is facing a limited economic situation because Marcelino's income comes from occasional jobs. Therefore, there is a need to strengthen and facilitate access to social programs such as community kitchens in the district and other available support.

requires specialized medical follow-up and care for the management of spastic hemiplegia, as well as physical rehabilitation therapies that help maintain or improve mobility and prevent complications, along with support from the Church that promotes emotional well-being and mental health

How Did This Donation Meet These Needs And Make A Lasting Impact?

This donation of nutritional rice will provide support to cover part of their basic food needs at home. This contribution is especially significant considering the family's economic vulnerability and their dependence on the occasional income of their brother Marcelino. This will partially reduce the expenses allocated for purchasing food and allow them to have greater capacity to direct their limited resources toward other priority needs, such as transportation, medical care, and rehabilitation. We, as a Church, were able to accompany the family in prayer.

Please Provide A Quote From The Individual About How They Feel After Receiving This

Donation.

Marcelino stated: "I feel very grateful for this help." For us, it means a lot that you have reached out and thought of our family. Sometimes one feels alone with their difficulties, but receiving this support gives us joy and hope. Thank you for coming and for sharing with us. "Thank you for coming and for sharing with us."

Why Were The Items Distributed Here? What Are The Greatest Needs In This Community?

The Camino de Vida church coordinating with the municipality of Kumpirushiato in the province of La Convención, in the department of Cusco, Peru. The delivery of mannapack, kids care and sandals was coordinated to about 9 communities. Being the first time that our house reaches the communities, places where you can get 3 4 hours by car or more. There are communities where you can only walk between 5 to 8 days walking, there is no other way to access these areas. Currently, there are still communities that are not reintegrated into society, making it more difficult to reach these places due to the risks to which they can be exposed. One of the difficulties that also presents itself is the language since they communicate with dialects. Miguel is part of the native community Kamunashiari, In this community live around 45 families.

Name

Miguel Quispe Quispe

Age

59

Gender

Occupation

farmer

Family Size

2

What Are Their Living Conditions?

Life in this community is very extreme, a lot of need. Most families do not have basic services, the water they consume is from the river, the food is very scarce, their main foods are cassava, coffee, beans. Being a very unnutritive diet. They count for few resources to get a good diet.

Describe The Types Of Needs This Individual Has.

Miguel and his wife are adults and they live together, they don't have children so help for them is very scarce. But it nourishes the needs they have are the lack of basic services, a house to live with

dignity, economic, they need medicines since because they are adults they require more care but the economy is not enough for them

How Did This Donation Meet These Needs And Make A Lasting Impact?

Due to climate change around the world, their plantings were affected and therefore the little food they get from their farms was affected. This nutritional rice will be of great help to you to be able to cope with a few days and to be able to have a better nutritious diet, for the same reason that they are adults they require a special diet

Please Provide A Quote From The Individual About How They Feel After Receiving This Donation.

Miguel said:

God is great, my trust and my gratitude is in dad God for him gives us life and everything that we need. He always bless us in one way or another.

What Are Their Living Conditions?

Life in this community is very extreme, a lot of need. Most families do not have basic services, the water they consume is from the river, the food is very scarce, their main foods are cassava, annatto, coffee, beans. Being a very unnutritive diet, Santonita is part of the Native Community Kamunashiari. here life about 45 families.

Describe The Types Of Needs This Individual Has.

Santonita is sick of the bromchi, rheumatism, she lives with her husband, they don't have children,

Miguel who is an adult and is also a little delicate in health, what they need is financial help, medicines and a good diet, added to all this they need a more comfortable house, safe and sheltering house.

How Did This Donation Meet These Needs And Make A Lasting Impact?

Due to climate change there is much more scarcity than normal in all communities so fortified rice arrived at a time of great need for all the people who are benefiting. Santonita has anemia so rice will be of great help for her health recovery.
