Why Were The Items Distributed Here? What Are The Greatest Needs In This Community?

We came up with Stefani's case thanks to Esther, who works in the community and supports the most needy people, Esther is an important link to reach the most vulnerable people. God blessed us with the great support of a missionary group of the HEIGHTS CHURCH of the United States. They were the ones who decided to say YES to build Stefani a prefabricated house and provide her with the donation of the Manna Pack and other necessities. God made all this possible.

Name

Stefani Vega Brancacho

Age

39

Gender

female

Occupation

Works out of the house- makes and sells cakes and some crafts to help support herself; Her mom helps take care of the kids and getting the food her daughter prepares ready for customers.

Family Size

5: Nancy (grandmother) 52, Stefani (mom) 39 , Antonella 7, Liam 11 and Dafne 13

What Are Their Living Conditions?

Stephanie lives in the district of Villa María del Triunfo (VMT) which has extreme climates - a very hot and dry in the summer and very cold and wet winters. The rain, often for hours on end, often makes the dirt roads impassable preventing children from attending school and adults from arriving at their jobs. It also causes respiratory lung diseases due to extreme levels of humidity.

Villa María del Triunfo, where Estefanía lives, is a district of extreme poverty. She lives in an area very close to the cemetery of Nueva Esperanza, one of the poorest areas of VMT. The area lacks sufficient infrastructure: stable electricity, paved roads, sewage and running water, and medical facilities.

Describe The Types Of Needs This Individual Has.

One of the main needs that Stefany and her family had was a new house. They lived in what would be described as a shack that was falling apart letting in the rain and cold in the winter and the dust and heat in the summer. Since Heights Church decided to build her a new house, this need, thank God, has been provided for. Other needs included provision for food, clothing for the children, school supplies, medicine and the list goes on.

Estefanía is a single mom and thus has trouble making ends meet. Thus their greatest need is financial.

How Did This Donation Meet These Needs And Make A Lasting Impact?

This donation was very helpful since as a single mother, Estefanía, does not have economic resources to buy sufficient and healthy food for growth. Her children need the vitamins and protein that the Manna Pack will help provide for their healthy growth. Anemia is a big problem in areas like VMT where financial hardship is prevalent.

Please Provide A Quote From The Individual About How They Feel After Receiving This Donation.

God is so good, not only I am being blessed but also several families within my community. Keep being those outstretched hands of God to reach more people so they can know the love of God. Thank you so very much.

Why Were The Items Distributed Here? What Are The Greatest Needs In This Community?

Camino de Vida church coordinated with the municipality of Kumpirushiato in the province of La Convención, in the department of Cusco, Peru to select this area for distribution of the donations. Manna Pack, Kids Care Kits and sandals were distributed to 9 communities. Being the first time that our house reaches the communities, places where you can get 3 4 hours by car or more. There are communities where you can only walk between 5 to 8 days walking, there is no other way to access these areas.

Kumpirushiato is considered high rainforest and has a tropical, warm, and humid climate. It experiences a heavy rainy season that often triggers landslides, temporarily cutting off roads.

Currently, there are still communities that are not integrated into society, making it more difficult to reach these places due to the risks to which they can be exposed. One of the other difficulties that presents itself is the language since the the indigenous tribes have their own languages and also communicate with dialects.

The greatest needs of the area are access to healthy and balanced food supply, sufficient and close medical care and education for the children beyond primary level..

Name

Dina Pushio Cashiari

Age

66

Gender

female

Occupation

Housewife

Family Size

6

What Are Their Living Conditions?

Life in this community is very extreme, a lot of need. Most families do not have basic amenities and services. The water they consume is from the river which is also used for washing and bathing and contains the pollutants from the motors of the small boats traversing it. Food is very scarce and is primarily limited to what they can grow. Their main crops are their main foods are cassava or yuca, coffee, beans, uncucha (another root vegetable, morada potatoes (blue), and sweet potatoes. Lots of starches and little or no protein in their diets.

The women mostly stay at home and husbands go out to work in the field.

They live in wooden houses. The maximum degree of educational for the children is primary school (up to grade 6) and the they either have to leave the community or start working.

Describe The Types Of Needs This Individual Has.

Dina, like several people in the community, suffer from different diseases such as malnutrition, skin problems and respiratory issues. She needs medical care and medicine, neither of which are available to her in her community.

The greatest need is economic and there is a desire to live in a place where their life is less complicated not only for her, but for her children and grandchildren. As a community, she expressed, they feel abandoned and that the day will not come when she will be able to live in a dignified way.

How Did This Donation Meet These Needs And Make A Lasting Impact?

Anemia and malnutrition are extremely prevalent in the native community. Therefore the Manna Pack fortified rice will be very beneficial for the diet of both Dina and all members of her family and

the community

Please Provide A Quote From The Individual About How They Feel After Receiving This Donation.

Father God brought us this gift. I thank God and all those who made this donation possible.

Describe The Types Of Needs This Individual Has.

Everyone within the community has the same needs: basic amenities and provision: a house where they are their families can live, sufficient and healthy food, medical facilities and medicine and ways to provide for their families.

How Did This Donation Meet These Needs And Make A Lasting Impact?

Anemia and malnutrition are extremely prevalent in the native community. Therefore the Manna Pack fortified rice will be very beneficial for the diet of both Fany and all members of her family and the community

Please Provide A Quote From The Individual About How They Feel After Receiving This Donation.

Fany's husband said;

Thank you for bringing food for my family and for my entire community, We are a very remote place and we have almost no food. Thank you donors who continue to do miracles in many families and may God continue to be your provider so that you can continue to help more people in more places.

Magdalena said:

Thanks first to God who brought this blessing for me, my family and for all the native communities.

Nothing has ever come to this place before and God has already visited us. Thank you little sister!

Thank you church! Thank you World Help!
